smallcase rationale

The global IT & ITeS market reached USD 1.2 trillion in 2016-17, while the global sourcing market reached USD 173-178 billion. India remained the world's top sourcing destination in 2016-17 with a share of 55 per cent.

- Indian IT & ITeS companies have set up over 1,000 global delivery centres in over 200 cities around the world
- The internet industry in India is likely to double to reach USD 250 billion by 2020, growing to 7.5% of GDP
- Revenues of the IT BPM industry are estimated to be at around USD 154 billion in FY 2016-17. The industry is expected to grow to USD 350 billion by 2025
- The contribution of the IT sector to India's GDP stood at 7.7 per cent in 2016
- Indian IT exports are projected to grow at 7-8% in 2017-18 to USD 126 billion

This smallcase comprises IT & ITeS and online services companies to allow investors to efficiently track and invest in the information technology sector.

Methodology

Defining the universe

All publicly traded companies on the National Stock Exchange of India, covering 90% market capitalization, are included in the universe

Research

The Windmill Capital team does an in-depth research, along with internal presentations and decides the sub-sectors and segments to be included in the tracker

Stock Screening

- Proprietary liquidity filters are applied to remove ill-liquid stocks from the universe
- A special check is applied to remove stocks, where a significant part of the promoter holdings are pledged, to define the investable universe
- All stocks in the investable universes, belonging to the selected sub-sectors are checked individually to ensure perfect theme fit
- Final stocks are selected on the basis of combined rank calculated using various parameters like valuations, market share growth, earnings growth, profitability, earnings quality, intrinsic value & institutional holdings

Weighting

The list of selected stocks is weighted such that the risk contribution of each stock in the smallcase is equal. By focusing on risk instead of marketcap or value, this weighting scheme provides better diversification and protection against market volatility

Rebalance

This smallcase has a quarterly rebalance schedule. Once every quarter, sector trackers are reviewed by our research team to ensure the current list of constituents and their weights remain true to the theme

Ratios

Ratio	smallcase	Equity Large Cap
PE Ratio	24.75	24.24
PB Ratio	5.33	3.25
Sharpe Ratio	1.05	1.11
Dividend Yield (%)	2.12	1.41

Important Fields

Inception Date **March 3, 2014** Launch Date **February 12, 2019** Marketcap Category **Equity Large Cap**

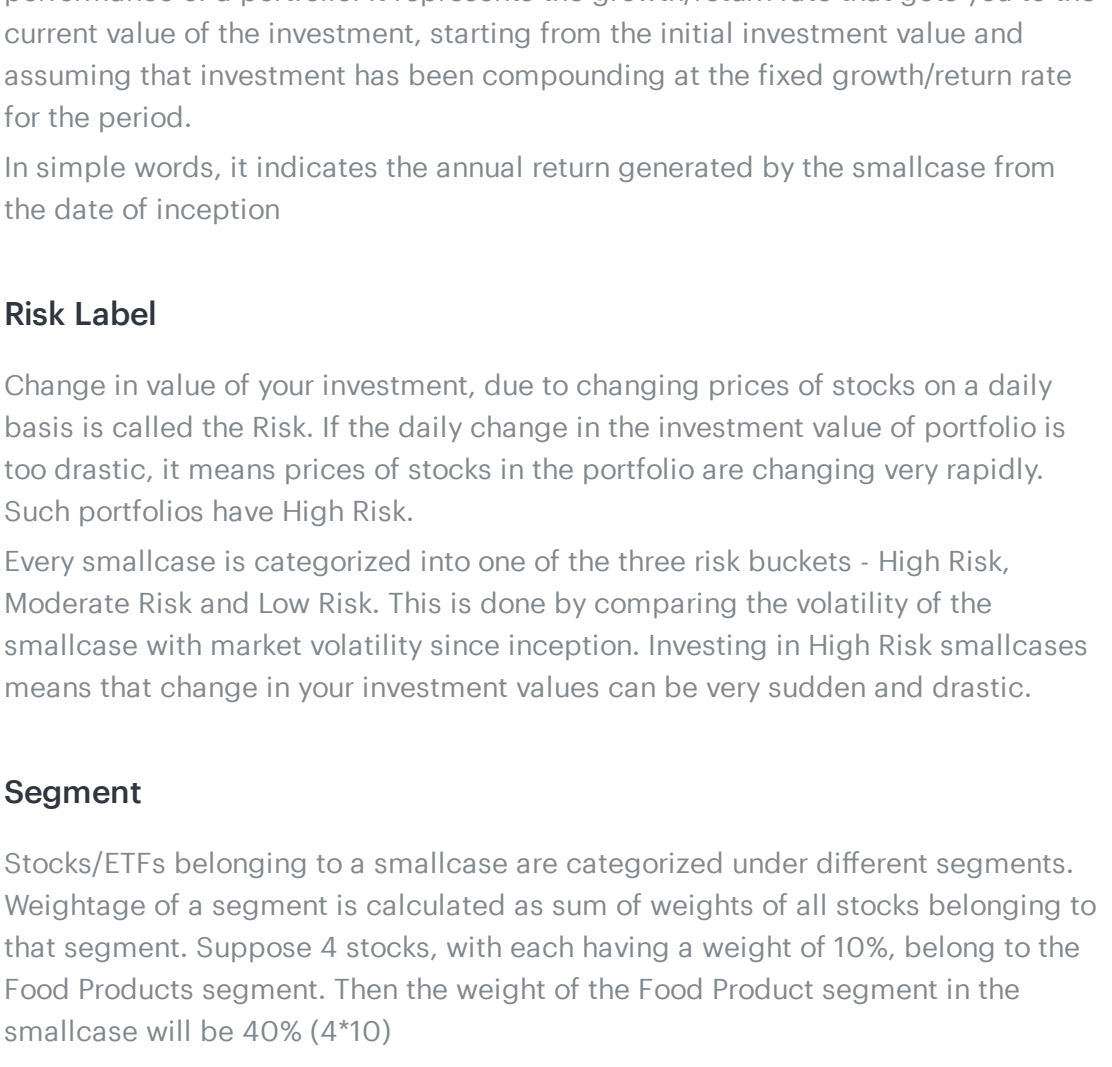

Review Frequency **Quarterly** Last Reviewed **September 16, 2020** Next Review On **December 16, 2020**

Market Cap Distribution

Past Performance Comparison with Equity Large Cap

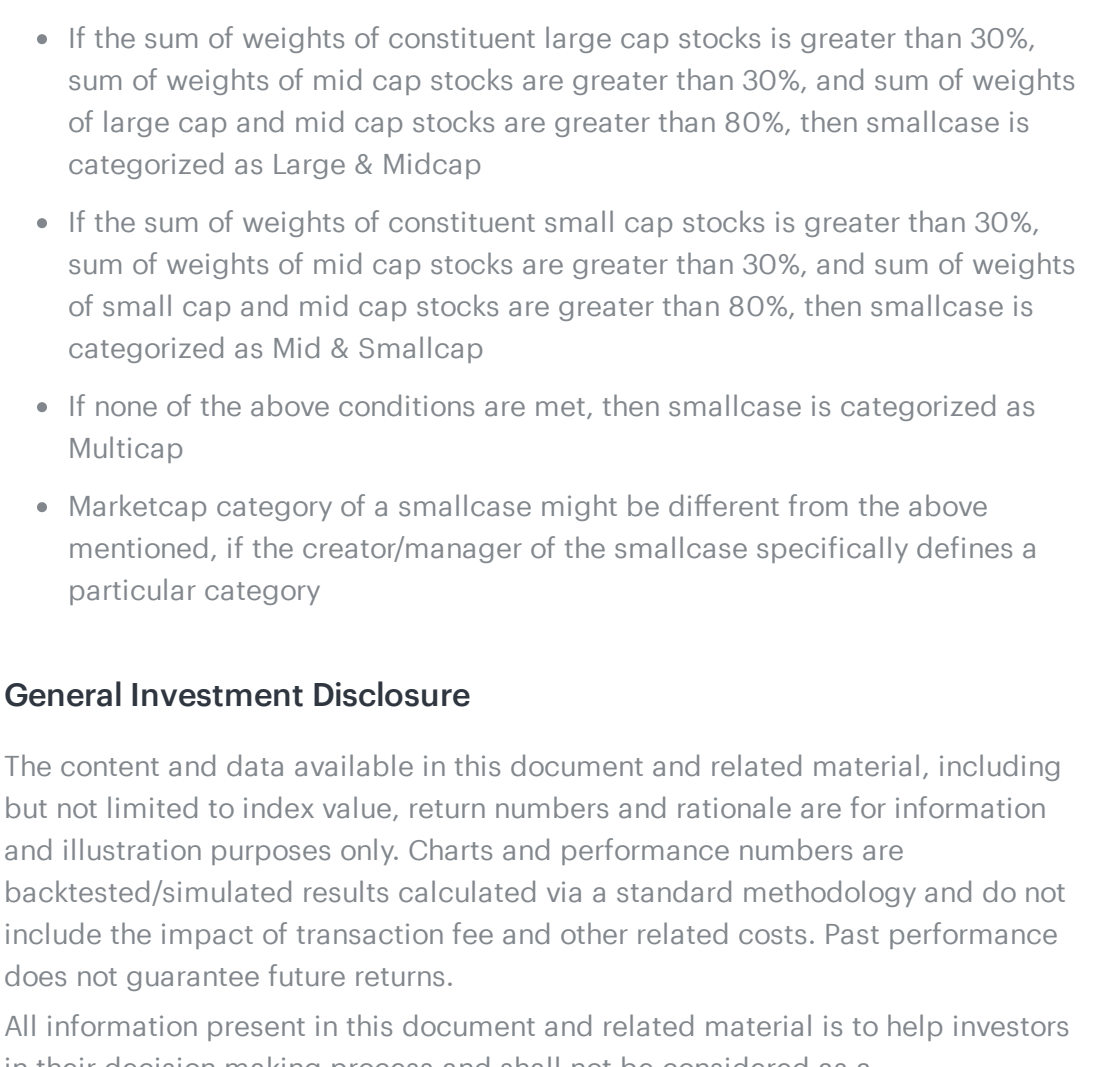

IT Tracker with Equity Large Cap

Returns over various periods

30.16%	90.14%	54.11%	101.62%
Equity Lar...	Equity Lar...	Equity Lar...	Equity Lar...
6.59%	26.52%	2.02%	10.82%

How to invest

Definitions and Disclosures

Index Value

Index value for all smallcases returns generated since their inception date and helps investors easily calculate the return from 100 since their inception or between two specific dates. For example, if the current index value of the smallcase is 150, it means it has generated 50% since its inception. If the index value of a smallcase was 215 last month and the current index value is 245, it means it has generated (245/215)-1 = 13.9% return in last one month

CAGR

CAGR (compounded annual growth rate) is a useful measure of growth or performance of a portfolio. It represents the growth/return rate that gets you to the current value of the investment, starting from the initial investment value and assuming that investment has been compounding at the fixed growth/return rate for the period.

In simple words, it indicates the annual return generated by the smallcase from the date of inception

Risk Label

Change in value of your investment, due to changing prices of stocks on a daily basis is called the Risk. If the daily change in the investment value of portfolio is too drastic, it means prices of stocks in the portfolio are changing very rapidly. Such portfolios have High Risk.

Every smallcase is categorized into one of the three risk buckets - High Risk, Moderate Risk and Low Risk. This is done by comparing the volatility of the smallcase with market volatility since inception. Investing in High Risk smallcases means that change in your investment values can be very sudden and drastic.

Segment

Stocks/ETFs belonging to a smallcase are categorized under different segments. Weightage of a segment is calculated as sum of weights of all stocks belonging to that segment. Suppose 4 stocks, with each having a weight of 10%, belong to the Food Products segment. Then the weight of the Food Product segment in the smallcase will be 40% (4*10)

Review

Rebalancing is the process of periodically reviewing and updating the constituents of a smallcase. This is done to ensure that stocks & weights in the smallcase continue to reflect the underlying theme or strategy

Market Cap Categorization of Stocks

All the stocks listed on NSE(National Stock Exchange) are arranged in decreasing order of Market Cap, so that the stock with the largest market cap gets 1st Rank. Stocks ranked equal to or below 100 are categorized as Large Cap. Stocks ranked below or equal to 250, but ranked above 100 are categorized as Mid Cap stocks. Stocks ranked above 250 are categorized as smallcap

Market Cap Categorization of smallcases

- If the sum of weights of constituent large cap stocks is greater than 50%, then smallcase is categorized as Largecap
- If the sum of weights of constituent mid cap stocks is greater than 50%, then smallcase is categorized as Midcap
- If the sum of weights of constituent small cap stocks is greater than 50%, then smallcase is categorized as Smallcap
- If the sum of weights of constituent large cap stocks is greater than 30%, sum of weights of mid cap stocks are greater than 30%, and sum of weights of large cap and mid cap stocks are greater than 80%, then smallcase is categorized as Large & Midcap
- If the sum of weights of constituent small cap stocks is greater than 30%, sum of weights of mid cap stocks are greater than 30%, and sum of weights of small cap and mid cap stocks are greater than 80%, then smallcase is categorized as Mid & Smallcap
- If none of the above conditions are met, then smallcase is categorized as Multicap
- Marketcap category of a smallcase might be different from the above mentioned, if the creator/manager of the smallcase specifically defines a particular category

Windmill Capital Disclosures

Windmill Capital Private Limited (hereinafter referred to as "the Company") is a SEBI registered Research Analyst having registration number - INH200007645 under SEBI (Research Analyst) Regulations, 2014. The registered address of the company is 51, 3rd Floor, Le ParcRichmonde, Richmond Road, Shanthala Nagar, Richmond Town, Bangalore - 560025. The Company is involved in research activities in Indian capital markets.

The Company has neither been suspended nor debarred from doing business by any Stock Exchange / SEBI or any other authorities; nor has its certificate of registration been cancelled by SEBI at any point of time.

The Company is not engaged in merchant banking, investment banking or any brokerage services.

Unless otherwise stated, the percentage returns displayed on the website or any other marketing materials are Absolute Returns.

Reports or research material prepared by the company are not to be construed as an offer to buy /sell or the solicitation of an offer to buy / sell any security in any jurisdiction where such offer or solicitation would be illegal. Reports or research material prepared by the company do not constitute a personal recommendation or take into account the particular investment objectives, financial situations, risk profile and needs of individual clients.

The content and data available in the material prepared by the company and on the website of the company, including but not limited to index value, return numbers and rationale are for information and illustration purposes only. Charts and performance numbers might include back tested/simulated results calculated via a standard methodology and do not include the impact of transaction fee and other related costs. Data used for calculation of historical returns and other information is provided by exchange approved third party data vendors and has neither been audited nor validated by the Company.

"Back-testing" is the application of a quantitative model to historical market data to generate hypothetical performance during a prior period. Use of back-tested data has inherent limitations including the following:

- The results do not reflect the results of actual trading or the effect of material economic and market conditions on the decision-making process, but were achieved by means of retrospective application, which may have been designed with the benefit of hindsight
- Calculation of such back-tested performance data is based on assumptions integral to the model which may or may not be testable and are therefore subject to losses.
- Actual performance may differ significantly from back-tested performance. Back-tested results are not adjusted to reflect the reinvestment of dividends and other income and, except where otherwise indicated, do not include the effect of back-tested transaction costs.
- Back-tested returns do not represent actual returns and should not be interpreted as an indication of such.

Information present in the material prepared by the company and on the website of the company shall not be considered as a recommendation or solicitation of an investment or investment strategy. Investors are responsible for their investment decisions and are responsible to validate all the information used to make the investment decision. Investor should understand that his/her investment decision is based on personal investment needs and risk tolerance, and information present in the material prepared by the company and on the website of the company is one among many other things that should be considered while making an investment decision.
